KARGER

The Karger Topic Article Package

is a new customer-orientated product that presents preselected journal articles and book chapters from the entire range of the Karger publishing program. Selections are made using brand-new technology that combines the strengths of computer technology with human judgment in automatic subject classification.

Karger publishes more than 100 peer-reviewed medical and scientific journals as well as some 50 new books every year. The use of artificial intelligence and automation paired with Karger's knowledge and expertise enables us to achieve and maintain a high level of relevance for our Topic Article Packages.

- ▶ Very specific thematic packages
- ▶ New format: contents (chapters and articles) of all Karger books and journals
- ▶ New: UNSILO Technology for automated text intelligence + UNSILO Classify
- ▶ Quick and easy way to relevant articles in your field
- ▶ Log on to www.karger.com/tap

-
- ▶ Please contact us with your requirements and ideas and let us help you create the one Topic Article Package for you.

Journal Information

Aims and Scope

Acta Haematologica is a well-established and internationally recognized clinically oriented journal featuring balanced, wide-ranging coverage of current hematology research. A wealth of information on such problems as anemia, leukemia, lymphoma, multiple myeloma, hereditary disorders, blood coagulation, growth factors, hematopoiesis and differentiation is contained in first-rate basic and clinical papers – some of which are accompanied by editorial comments by eminent experts. These are supplemented by short state-of-the-art communications, reviews and correspondence as well as occasional special issues devoted to “hot topics” in hematology. Cutting-edge clinical information, along with translational research relevant to clinical daily life, will keep the practicing hematologist well informed of the new developments in the field.

The field of adolescents and young adults (AYA) oncology is experiencing a very challenging time. This book is a guide to the key issues for any clinician and health professional managing AYA with cancer in Europe. Emphasis is on collaboration between adult and pediatric specialists. Authors present their perception of the current state of the most prominent primary issues in AYA oncology.

Chapters cover cross-cutting issues such as disease epidemiology, systems of care, access to innovative therapy and late effects of treatment and survivorship for AYA-onset cancers. There are discussions of the latest developments and the most important cancer types in AYA, including the shared perspectives of adult and pediatric specialists. Throughout the book recurrent challenges to the AYA community are exposed and solutions proposed.

Tumors in Adolescents and Young Adults is highly recommended to any oncologist or hematologist treating patients aged 15 to 39 diagnosed with cancer. It will also be of interest to other members of the multidisciplinary teams involved with this patient group.

Contents

Preface: **Stark, D.P.; Vassal, G.**

Cross-Cutting Issues

- Epidemiology of Adolescents and Young Adults with Cancer in Europe: **Desandes, E.; Stark, D.P.**
- Supportive Care: **Olsen, P.R.; Lorenzo, R.**
- Long-Term Follow-Up and Survivorship: **Tsirou, A.; Hjorth, L.**
- Increasing Access to Clinical Trials and Innovative Therapy for Teenagers and Young Adults with Cancer – A Multiple Stakeholders and Multiple Steps Process: **Gaspar, N.; Fern, L.**
- Collaboration and Networking: **Husson, O.; Manten-Horst, E.; van der Graaf, W.T.A.**

Specific Illnesses

- Adult Cancers in Adolescents and Young Adults: **Laurence, V.; Marples, M.; Stark, D.P.**
- Pediatric Cancers and Brain Tumors in Adolescents and Young Adults: **McCabe, M.G.; Valteau-Couanet, D.**
- Leukemia: **Juliussøn, G.; Hough, R.**
- Lymphoma in Adolescents and Young Adults: **Brugières, L.; Brice, P.**
- Germ Cell Tumors in Adolescents and Young Adults: **Calaminus, G.; Joffe, J.**
- Sarcomas of Soft Tissue and Bone: **Ferrari, A.; Dirksen, U.; Bielack, S.**

Digital biomarkers are defined as objective, quantifiable physiological and behavioral data that are collected and measured by means of digital devices such as portables, wearables, implantables or digestibles. The data collected is typically used to explain, influence and/or predict health-related outcomes. Digital biomarkers also represent an opportunity to capture clinically meaningful, objective data.

Multidisciplinary by design, this innovative open access journal bridges the disciplines of computer science, engineering, biomedicine, regulatory science and informatics. Papers are published within 60 days of submission and the inclusion of videos or other visual materials is supported. Moreover, *Digital Biomarkers* provides and supports access to data, algorithms and app-repositories linked to the articles published in the journal.
