### Aims and Scope

*Pharmacology* is an international forum to present and discuss current perspectives in drug research. The journal communicates research in basic and clinical pharmacology and related fields. It covers biochemical pharmacology, molecular pharmacology, immunopharmacology, drug metabolism, pharmacogenetics, analytical toxicology, neuropsychopharmacology, pharmacokinetics and clinical pharmacology. In addition to original papers and short communications of investigative findings and pharmacological profiles, the journal contains reviews, comments and perspective notes; research communications of novel therapeutic agents are encouraged.

Digital biomarkers are defined as objective, quantifiable physiological and behavioral data that are collected and measured by means of digital devices such as portables, wearables, implantables or digestibles. The data collected is typically used to explain, influence and/or predict health-related outcomes. Digital biomarkers also represent an opportunity to capture clinically meaningful, objective data.

Multidisciplinary by design, this innovative open access journal bridges the disciplines of computer science, engineering, biomedicine, regulatory science and informatics. The editorial board includes leaders from academia, life sciences, technology and government, thus reflecting the broad scope of the journal. Papers are published within 60 days of submission and the inclusion of videos or other visual materials is supported.

# The Karger Topic Article Package

is a new customer-orientated product that presents preselected journal articles and book chapters from the entire range of the Karger publishing program. Selections are made using brand-new technology that combines the strengths of computer technology with human judgment in automatic subject classification.

Karger publishes more than 100 peer-reviewed medical and scientific journals as well as some 50 new books every year. The use of artificial intelligence and automation paired with Karger's knowledge and expertise enables us to achieve and maintain a high level of relevance for our Topic Article Packages.

- ▶ Very specific thematic packages
- ▶ New format: contents (chapters and articles) of all Karger books and journals
- ▶ New: UNSILO Technology for automated text intelligence + UNSILO Classify
- ▶ Quick and easy way to relevant articles in your field
- ▶ Log on to [www.karger.com/tap](http://www.karger.com/tap)

- 
- ▶ Please contact us with your requirements and ideas and let us help you create the one Topic Article Package for you.
