# Karger eBook Archive Collection

Order before December 31, 2015 and take advantage of our special anniversary discount of 25%.

## All Karger titles digitized back to 1890

To mark the occasion of Karger Publishers' 125th anniversary, all book titles from 1996 back to 1890 have been digitized, making the rich heritage of pioneering Karger publication available to today's medical and scientific community.

The complete Karger eBook Archive Collection comprises three individual collections:

- Series
- Non-Series
- German

They can be purchased singly or in combination, and encompasses over 2,400 titles, including nearly 700 out-of-print titles, as well as numerous books not previously available in electronic format.

Complete your existing holdings or make sure your library has access to all Karger medical classics, past and present, with the Karger eBook Archive Collection.

For more information, please contact us at:

*Psychotherapy and Psychosomatics* publishes research articles on clinical issues in medicine and psychiatry, with special reference to psychotherapy and psychosomatic research. The journal features editorials and review articles on current and controversial issues; innovations (both in terms of conceptualization and pilot studies); case management articles (biopsychosocial management in clinical medicine); clinical notes; letters to the editor (both comments on published articles and preliminary research).

### Submission

Only papers written in English are considered and should be submitted using the online submission website at:

[www.karger.com/pps](http://www.karger.com/pps)

Should you experience any problems with your submission, please contact

Giovanni A. Fava, MD  
Dipartimento di Psicologia  
Università di Bologna  
Viale Berti Pichat 5  
I-40127 Bologna (Italia)  
E-Mail: [giovanniandrea.fava@unibo.it](mailto:giovanniandrea.fava@unibo.it)

### Conditions

All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of *Psychotherapy and Psychosomatics* and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

### Conflict of Interest

All forms of support and financial involvement (e.g. employment, consultancies, honoraria, stock ownership and options, expert testimony, grants or patents received or pending, royalties) which took place in the previous three years should be listed in the acknowledgement section of the paper, regardless of their potential relevance to the paper. In the cover letter to the editor, the corresponding author should certify that all forms of conflict of interest by all authors were clearly identified in the text. Authors of systematic reviews concerned with therapeutics are asked to report funding sources and conflicts of interest of the studies that were selected.

### Arrangement

**Title page:** The first page of each paper should indicate the title, the authors' names, the institute where the work was conducted, and a short title for use as running head.

**Full address:** The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

**Key words:** Please supply 3–10 key words in English that reflect the content of the paper.

**Abstract:** Abstracts should be no longer than 250 words for regular articles, and no longer than 150 words for clinical notes. They should include the following information: **Background:** the problem that prompted the study and the purpose of the study; **Methods:** data sources, subjects, design, measurements, data analysis; **Results:** most important findings; **Conclusions:** implications, future directions. Abstracts for Special Articles do not need to be structured. Editorials, Case Management articles and Letters to the Editor should not have an abstract.

**Footnotes:** Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

**Tables and illustrations:** Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate sheets. Tables require a heading and figures a legend, also prepared on a separate sheet. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 × 223 mm) or provide crop marks. On the back of each illustration, indicate its number, the author's name, and 'top' with a soft pencil. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

### Color illustrations

**Online edition:** Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

**Print edition:** Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

**Data analysis:** Adequate description of statistical analysis should be provided, including the types of statistical tests and whether they were one- or two-tailed. Standard deviations, instead of standard errors of the mean, are preferred. All significant results must include the test value, degree(s) of freedom, and probability level.

**References:** In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals ([www.icmje.org](http://www.icmje.org)).

### Examples

(a) *Papers published in periodicals:* Sun J, Koto H, Chung KF: Interaction of ozone and allergen challenges on bronchial responsiveness and inflammation in sensitised guinea pigs. *Int Arch Allergy Immunol* 1997;112:191–195.

(b) *Papers published only with DOI numbers:* Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. *Int Arch Allergy Immunol* DOI: 10.1159/00063858.

(c) *Monographs:* Matthews DE, Farewell VT: *Using and Understanding Medical Statistics*, ed 3, revised. Basel, Karger, 1996.

(d) *Edited books:* Parren PW, Burton DR: Antibodies against HIV-1 from phage display libraries: Mapping of an immune response and progress towards antiviral immunotherapy; in Capra JD (ed): *Antibody Engineering*. Chem Immunol. Basel, Karger, 1997, vol 65, pp 18–56.

**Reference Management Software:** Use of EndNote is recommended for easy management and formatting of citations and reference lists.

### Digital Object Identifier (DOI)

S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at [www.doi.org](http://www.doi.org).

### Supplementary Material

Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

### Author's Choice™

Karger's Author's Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at [www.karger.com](http://www.karger.com). The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at [www.karger.com/authors\\_choice](http://www.karger.com/authors_choice).

### NIH-Funded Research

The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author's Choice™ service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo. More details on NIH's Public Access Policy is available at <http://publicaccess.nih.gov/policy.htm>

### Self-Archiving

Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution's servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher's version, and must acknowledge the publisher's copyright. Authors selecting Karger's Author's Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copyediting and design improvements as well as citation links.

### Page Limitations and Charges

There are no page charges for papers of 7 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equal to approx. 18 manuscript pages (including tables, illustrations and references). Letters commenting on published articles should not exceed 500 words of text plus references. Research letters should not exceed 1,000 words of text plus a maximum of 10 references. They may have only one table or figure.

### Proofs

Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer's errors are charged to the author.

### Reprints

Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

Orders may be placed with any bookshop, subscription agency, directly with the publisher or through a Karger distributor.

This book offers a series of authoritative reviews on pain in psychiatric disorders written by leading experts. They discuss the complex interplay between pain and psychiatric disorders such as anxiety, depression and borderline personality disorder, as well as neurosteroids, epigenetic mechanisms and TRPV1, with a strong focus on neurobiological mechanisms and current and future therapeutic targets. Special attention is given to the importance of inflammation and the immune system as a common substrate in both pain and psychiatric disorders.

The state-of-the-art reviews present both preclinical and clinical research, providing the reader with sound knowledge that provides a basis for further research and clinical practice. *Pain in Psychiatric Disorders* is of special interest to psychiatrists, neurologists, neuroscientists, pharmacologists and other healthcare professionals treating pain in psychiatric patients, as well as research students with an interest in this field.

## Contents

Preface: **Finn, D.P.; Leonard, B.E.**

- Animal Models for the Study of Comorbid Pain and Psychiatric Disorders: **Leite-Almeida, H.; Pinto-Ribeiro, F.; Almeida, A.**
- Pain, Depression and Inflammation: Are Interconnected Causative Factors Involved?: **Leonard, B.E.**
- Neuroinflammatory Mechanisms Linking Pain and Depression: **Burke, N.N.; Finn, D.P.; Roche, M.**
- Cytokines in Neuropathic Pain and Associated Depression: **Lees, J.G.; Fivelman, B.; Duffy, S.S.; Makker, P.G.S.; Perera, C.J.; Moalem-Taylor, G.**
- Biogenic Amines and the Amino Acids GABA and Glutamate: Relationships with Pain and Depression: **Benson, C.; Mifflin, K.; Kerr, B.; Jesudasan, S.J.B.; Dursun, S.; Baker, G.**
- Supraspinal Transient Receptor Potential Subfamily V Member 1 (TRPV1) in Pain and Psychiatric Disorders: **Madasu, M.K.; Roche, M.; Finn, D.P.**
- Involvement of Neuroactive Steroids in Pain, Depression and Anxiety: **Mifflin, K.; Benson, C.; Kerr, B.; Aricioglu, F.; Cetin, M.; Dursun, S.; Baker, G.**
- Visceral Pain and Psychiatric Disorders: **Felice, V.D.; Moloney, R.D.; Cryan, J.F.; Dinan, T.G.; O'Mahony, S.**
- Genetic and Epigenetic Mechanisms Linking Pain and Psychiatric Disorders: **Swiergiel, A.H.; Juszcak, G.R.; Stankiewicz, A.M.**
- Emotional and Cognitive Influences on Pain Experience: **Peters, M.L.**
- Generalized Anxiety Disorder and Pain: **Bandelow, B.**
- Pain in Borderline Personality Disorder: **Schmahl, C.; Baumgärtner, U.**

Section on Clinical Psychopathology

*Psychopathology* is a record of research centered on findings, concepts, and diagnostic categories of phenomenological, experimental and clinical psychopathology. Studies published are designed to improve and deepen the knowledge and understanding of the pathogenesis and nature of psychopathological symptoms and psychological dysfunctions. Furthermore, the validity of concepts applied in the neurosciences of mental functions are evaluated in order to closely bring together the mind and the brain. Major topics of the journal are trajectories between biological processes and psychological dysfunction that can help us better understand a subject's inner experiences and interpersonal behavior. Descriptive psychopathology, experimental psychopathology and neuropsychology, developmental psychopathology, transcultural psychiatry as well as philosophy-based phenomenology contribute to this field.
