

Subject Index

- ABO(H) 233
Absorbable splint 112
Acute rejection 230
Adenocarcinoma, clear cell 294
Adenylyl cyclase 331
Adjuvant immunotherapy 251
Adolescent 179
Adrenal myelolipoma 132
Androgen receptor 298, 307
Androstenedione 307
Angiotensin-converting enzyme 100
Anomalies of the urethra 287
Antireflux plasty 173
Artificial sphincter 173
Aspiration cytology 181
Atrophy 282
Autonomic agonists 320
– antagonists 314
– drugs 260

Benign urethral polyp 287
Betratron radiation therapy 25
Bilateral testicular torsion 179
Biological control 274
Biosynthesis 241
Bladder 43, 93, 235, 277
– cancer 238
– tumor 155
Blood group 233
– transfusions 217
Bone scan 45, 164

Calcium antagonists 13
– excretion 13, 65
Cancer, bladder 233, 301
Captopril 220
Carcinoma of the bladder 97
– – – prostate 155
–, transitional cell 294
Cavernosography, dynamic 206
Cavernous nerves 60
Cecal volvulus 1
Cell kinetics 36
Cells, natural killer 302
Chemotherapy 48
Chromosomal aberrations 145
Circadian variation 331
Colpo-cystourethrography 224
Complications of nephrectomy 1
Computed tomography 25

Congenital penile deviation 267
– polyp of the prostatic urethra 287
– urethral polyp 287
Conservative management 230
– treatment 128
Cystitis, experimental 211
Cytology 36
Cytotoxic lymphocytes 251

Danazol 277
Dehydroepiandrosterone sulfate 307
Development of transurethral resection 227
Diagnostic problems 132
5,5-Dimethyl-2,4-oxazolidinedione method 190
DNA-single-cell fluorescence photometry 76

Electron microscopy 294
Electrostimulation 60
Endocrine therapy 103
– –, adverse effects 103
Endometriosis 277
End-to-end anastomosis 107
Erection, artificial 206
Estradiol 307
Etiologic agent 145
Experimental and clinical studies 241

Female urinary incontinence 235
Fibrin 141
Fibrosis of corpus cavernosum penis 343
Fluctuating urethral pressures 325
Fluid absorption toxicity 227
Furosemide 220
– renography 347
– urography 347

Galactosyltransferase 269
Genital herpetic infection 22
Genuine stress 201
Germ cell tumors 166
Glutamic acid 274
GOT 274
GPT 274
Grading 36
Graft rupture 230

Histology 36
Human chorionic gonadotropin 72
– testicular tumors 160

Hydronephrosis 347
–, recovery from 220
Hypercalcemia 164
Hypercalciuria 13
Hypogastric nerve 314

Idiopathic detrusor instability 257
– hypercalciuria 65
Immediate management 128
Immunological parameter 155
Incurable bladder cancer 121
Indomethacin 220
Infrapubic approach 343
Inhibition of biosynthesis 241
Inosine 220
Interferon, alpha-2 301
Intermittent self-catherization 173
Intestinal malignancies 145
– obstruction 1
Intracellular pH 190
Inverted papilloma 93
In vivo recording of pacemaker potential 260
Isoantigens 233

Kidney 307
Kidney stones 65

Leiomyoma 43
Lesch-Nyhan syndrome 138
Leukapheresis 284
Leukemic infiltration 292
– priapism 284
Linitis plastica of the bladder 116
Lymphangiography 181
Lymphoid 145

Male incontinence 30
– infertility 5
Mannitol 220
Mechanism of injury 128
Metabolic acidosis 190
Microsurgery 107, 112, 337
Microtransducers 201
Motility 320
Multiple and solitary metastases 148
Mycoplasmas 5

Natural killer cells 251
Nephrocalcinosis 13
Nerve stimulation 196

- Nesbit-Kelâmi technique 267
 – procedure 206
 Neurogenic bladder 173
 Nifedipine 13
- Oestrogen receptor 331
 Operations 48
 Oral calcium load 65
 Orchiopexy 179
 Osmolality 196
 Overdistension 211
- Pacemaker of ureteral peristalsis 260
 Parameters of prognostic significance 121
 Pelvic nerve 314
 Penile curvature 206
 – erection 60
 Perfusion test 347
 Perineal instability 325
 Permeability 211
 Polyamines in tumor metabolism 241
 Polychemotherapy 166
 Polyp of the posterior urethra 287
 Posterior urethral polyp 287
 Postoperative complications 227
 Postpriapism 343
 Prednisolone 220
 Pregnancy-specific β_1 -glycoprotein 72
 Preoperative cooperation 227
 Prognostic parameters 148
 Prolactin receptor 331
 Prostate 331
 – cancer 76
 Prostatein 331
 Prostatic cancer 45, 181
 – carcinoma 25, 36, 103, 116, 298
 – malacoplakia 10
 – tissue 292
 Prostatitis 5
 Psychological factors 257
 Psychosomatic disorder 257
 Pyelocystostomy 82
- Radiotherapy planning 25
 Rat 217
 – bladder 211
- Reduction of toxicity 241
 Reflux nephropathy 173
 Renal autotransplantation 82
 – carcinoma 88
 – cell carcinoma 155, 251
 – vein involvement 148
 Resection of segments 107
 Rosen prosthesis 30
 Rupture of corpus cavernosum 128
- Semen quality 5
 Seminal plasma 269
 Seminoma 72, 282
 Sexual life 3
 Signet-ring cell carcinoma 116
 Skin metastases 298
 Small-Carrion prosthesis 343
 Smooth muscle 196
 Sodium bicarbonate 190
 Sperm penetration 269
 Spontaneous contractions 196
 Staging 25, 48, 181
 Statistic evaluation 76
 Steroid hormone receptor analysis 160
 Stone formation 274
 Surgery 132
 Surgical therapy 128
 Syncytiotrophoblastic giant cells 72
- Testicle tumors 155
 Testis 282
 Testosterone 307, 331
 Therapeutic studies 241
 Tissue adhesives 141
 Total hysterectomy 224
 Transgladular cavernosum-spongiosum shunt 284
 Transitional cell carcinoma 164
 Transrectal ultrasonography 25
 Transurethral prostatic resection, 'minimal' and 'total' 3
 Transverse division of the ureter 107
 Tripeptidyl carboxypeptidase 100
 Tris buffer (THAM) 190
 Tubular disorder 13
 Tubulovasostomy 112
- Tumor 282
 – thrombus 88
 Tumour growth 217
- Ultrasound evaluation 88
Ureaplasma urealyticum 5
 Uremia 190
 Ureter 277
 Ureteral surgery 107
 Ureteroduodenal fistula 33
 Ureterocystoneostomy 277
 Urethra 294, 314, 320
 Urethral instability 325
 – polyp 287
 – pressure profile 201
 Urge incontinence 201
 Uridine 269
 Urinary bladder 196
 – enzymes 274
 – incontinence 173, 224
 – neopterin 155
 – retention 22, 43
 – tract infection 138
 Urinoma 97
 Urodynamics 82, 235
 Urogenital 145
 – tract 100
 Uromucoid 13
- Vasocpididymostomy 337
 Vasoductulostomy, direct and indirect 337
 Ventral penile deviation 267
 Vesicovaginal fistula 141
 Viruses 145
- Watch policy 48
- Xanthine calculi 138
 X-ray therapy 48
- Young adult 238
