

Subject Index

- Abdominal aortic aneurysm 216
 ABO (H) antigens 397
 Accuracy 276
 Acid-base status 161
 Action potential 266
 Acute hemorrhagic cystitis 152
 – retention 430
 Adenomatoid tumor 232
 Adenovirus type II 152
 β_2 -Adrenoceptor stimulation 158
 Adriamycin, intravesical 254
 Allergy 457
 Alloplastic prosthesis 9
 Allopurinol 387
 Alpha-stimulant 312
 Anal electrostimulation 411
 Anatomy, urinary bladder 121
 Androgen receptors 133
 Anesthesia, local 246
 Angioinfarction 42
 Angiomyolipoma 216
 Antibiotics 64
 Arginine hydrochloride 161
 Artificial ureter 9
 Autonomous energy supply 9
 Autopsy study 276

 Bacillus Calmette-Guérin immunotherapy 254
 Bacterial extract 433
 Bacteriuria 64
 Basal tone 170
 Basement membrane 248
 Benign prostatic hyperplasia 430
 – hypertrophy 133
 Biological response modifier 444
 Bladder 192
 – augmentation 21
 – cancer 403
 – carcinoma 248
 – hemorrhage 451
 – inhibition 62
 – irritation 88
 – stimulator 241
 – tumor 397
 Bolus volume 174

 Calcium 329
 – urolithiasis 348, 387
 Cancer, superficial bladder 254
 Carcinoembryonic antigen 232, 397
 Carcinoma in situ 238
 Catheterization 437
 Cavernous hemangioma 309
 Cervical carcinoma 219
 Cervix neoplasms 434
 Chemotherapy sensitivity testing 112
 Chromosome aberrations 403
 Chronic pyelonephritis 180
 Circadian rhythm 81
 Clinical decision 64
 Coecocystoplasty 21
 Collagen, polarizing microscopy 91
 Collateral supply 42
 Complications 21
 Computed tomography 222
 Conduction velocity 266
 Conservative treatment 348, 387
 Core biopsy, prostate 276
 Cystometry 196
 Cystoscopy 202
 Cytogenetic markers 403

 Detrusor hyperreflexia 202
 – instability 196, 199, 202
 Diabetes mellitus 455
 Diagnosis 222
 Dibutyl cyclic AMP 117
 5,5-Dimethyl-2,4-oxazolidinedione method 161
 Dog 426
 Dormia loop 369
 Down's syndrome 238
 Drug-induced erection 202

 Electrical stimulation 266
 Electromyogram 266
 Embolization 42
 Emepronium bromide 199
 End-stage renal disease 102
 Enuresis 196
 Eosinophilic cystitis 457
 Epidemiology 348
 Epidermoid cyst 315
 Epididymis 232
 Erectile hemodynamics 207
 Estrogen deficiency 455
 Experimental hydronephrosis 426
 Extracorporeal circulation 303
 – shock-wave lithotripsy (ESWL) 246, 357, 385

 Female urge incontinence 158
 Fever 64
 Fiberoendoscopy 260
 Fibrosis, renal 91
 Fluorosis, renal 91

 Giant hydrourteronephrosis 447
 Glycosaminoglycans, urine 81
 Gravidity 241

 Hemorrhoidectomy 67
 Human renal cell carcinoma 112
 Hydrocele, pediatric communicating 432
 Hydronephrosis 451
 Hydronephrotic atrophy 422
 Hyperoxaluria 393
 Hypertension 95

 Iatrogenic urinary calculi 34
 Ileal conduit 225, 260
 Immunohistochemistry 397
 Immunoperoxidase 232
 In vitro cell culture 112
 Incomplete ureteral obstruction 426
 Incontinence, postprostatectomy 35

- Indwelling catheter 437
 Infection, urinary 109
 Inferior vena cava thrombus 318
 Inhibitors 329
 Intermediate filament 57
 Intracavernous injection 312
 Intracellular pH 161
 Intracorporeal blood gases 202
 Intraluminal catheter 1
 Intravesical formalin 451
 Ischemic injury, renal 91
 Isolated human minor calyx 170
- Keratin 232
 Kidney 407
 – diseases 289
 – metastasis 307
 – parenchyma, surgery 385
 – rupture 216
 Klinefelter's syndrome, 48,XXYY 235
- Labial adhesions 455
 Laboratory investigation 348
 Laminin 248
 Lectins 57
 Lithotripsy 246
 Long-term investigation 270
 Lower urinary tract infection 26
 Lumbotome 375
- Malignant melanoma 307
 Mefenamic-acid stones 334
 Metabolic alkalosis 161
 Metaphylaxis 343
 Metastatic penile cancer 465
 – prostatic cancer 228
 – renal tumor 219
 Methyltrienolone 133
 Metoclopramide 192
 Mibolerone 133
 Microcrystals 88
 Micturition 121
 Mononuclear cell infiltration 187
- N⁴-acetylsulfadiazine stones 334
 N⁴-acetylsulfamethoxazole stones 334
 Nephrectomy 42
 Nephrocarcinoma 299
 Nephrogenic hepatic dysfunction 180
 Nephrolithiasis 418
 New device 411
 – working sheath 375
 Noninvasive stone treatment 357
 Nosocomial infection 437
 Nuclear magnetic resonance 279
- Obstructive uropathy 422
 OM-8930 (Uro-Vaxom) 444
 Operative results 21
- Orchiectomy 315
 Oxalate 329, 343
 – analysis 334
 Oxalic acid 88
 Oxybutynin 16
- Pacemaker 167
 Paralyzed bladder 241
 Pathophysiological principles 35
 Pelvic floor exercise 129
 – plexus 202
 Pelviureteral electromyogram 117
 Penile cancer 465
 – hemangioma 309
 Percutaneous litholapaxy 369, 385
 – operations 375
 – puncture 447
 Perianal electrical stimulation 62
 Phenol 202
 Phenoxybenzamine 430
 Pheochromocytoma 299
 Phosphate 343
 Physiotherapy 129
 Pig ureter, in vivo and in vitro 266
 Polarization 121
 Post-traumatic priapism 312
 Potassium-sodium citrate 387
 Pressure profilometry 26
 Promoters 329
 Prophylactic antibiotics 199
 Prostaglandin E₂ 139
 Prostaglandins 170, 407
 Prostate 407
 – cancer 279, 465
 – neoplasms 279
 Prostatic adenoma 139
 – cancer 228
 – carcinoma 284
 Prostatitis 139
 Pull-through force measurement 26
 Pylonephritic scarring 102
 Pyonephrosis 77
 Pyridoxine 393
- Radiation cystitis 451
 – therapy 284
 Radical surgery 303
 Rat testicle 145
 Recanalization 42
 Recurrence prevention 387
 – rate 187, 348
 Recurrent urinary tract infections 196
 Reflex bladder 16
 Renal cell carcinoma 57, 303
 – failure 161
 – function study 426
 – hemorrhagic infarction 212
 – hypertension 42
 – papillary necrosis 212
- pelvic pacemaker 117
 – – pressure 117
 – – – elevation 167
 – – – waves 292
 – pelvis carcinoma 112
 – – urothelial carcinoma 212
 – stones 387
 – transplantation 152
 – tubular antigens 57
 – vein renin ratios 95
 – – thrombosis 77
 Renin 95
 Reno-colic-cutaneous fistula 222
 Residual urine 67
 Retroperitoneal lymphadenectomy 318
- Scrotal hemangioma 309
 Secondary renal tumor 219
 Seminal vesicles 407
 Seminoma 238
 Septic thrombosis 77
 Silica 70
 – stones 70
 Silicon dioxide stones 334
 Skin ulcer 235
 Small kidney 95
 Sodium cellulose phosphate 387
 Sphincteric action, pelvicallyceal junction 167
 Standardized flow 292
 Stone analyses 339, 343
 – patients 81
 Stones 343
 Stress incontinence 26, 129
 Stromal-epithelial tissue composition 133
 Superficial urothelial carcinoma, bladder 187
- Telemetric cystometry 263
 Temporary ischaemia 145
 Terbutaline 158
 Testicular biopsy 238
 – diseases 149
 – infarct 149
 – parenchyma 145
 – tumor 318
 Testis 149, 315, 407
 Thiazide 387
 Thomsen-Freidenrich (T) antigens 397
 Thromboxane A₂ 422
 Tranilast 457
 Transitional cell carcinoma 225
 Transurethral resection 284
 Treatment strategies 357
 Tumor dissemination 284
- Ultrasonography 216
 Ultrasound 369
 – examination 289
 – urethrocystoscopy 447

- Ultrasound-guided puncture 375
- Uninhibited bladder 16
- Upper urinary tract 192
- Uremia 161
- Ureter 192
 - model 1
 - , surgery 385
- Ureteral calculi 434
 - obstruction 434
 - peristalsis 1
 - peristaltic rate 174
 - pressure measurement 1
 - replacement 9
- Ureterolith 369
- Ureterorenoscopical stone removal 385
- Ureterorenoscopy 369
- Urethral pressure profile 26
 - pull-through force 26
 - sphincter 26
- Uric acid 343
 - - interaction 81
- Urinary bladder 88, 407
 - drainage system 437
 - fistula 434
 - incontinence quantitation 129
 - inhibiting activity 418
 - inhibitor excretion 418
 - peak flow 67
 - tract infection(s) 64, 102, 444
- Urine analysis 334
 - flow increase 174
- Urodynamics 21, 26, 192
- Uroflow measurements, pre- and postoperative 270
- Urogenital tract 407
- Urolithiasis 70, 329, 357, 393
- Urological control 67
- Uromanometrogram 1
- Urothelium 225, 369
- Vena cava inferior 303
 - - thrombosis 77
- Vesicoureteral reflux 102, 192
- Vulvitis 455
- Xanthogranulomatous pyelonephritis 180
- Zeiss loop 369
