

- Adenocarcinoma 110
 –, renal 40
 Angiography 166
 Anticancer drugs 12
 Antisperm antibody 143
 Appendix 97
 Arterial administration 117
 Arteriovenous fistula, postnephrectomy 99
 Asymptomatic infertile men 217
 Autologous tumor vaccine 6
 Autosomal aberration 107
 Azoospermia 222
- Benign prostatic hyperplasia 196
 Bladder 227
 – cancer cells 12
 – carcinoma 1
 – substitution with stomach, advantages 24
 – urothelium 155
 Bone metastasis 172
 Brachytherapy 209
 Burch colposuspension 150
 Bypass, cardiopulmonary 38
- Calcification 110
 Cancer genetics 1
 Carcinoma 125
 –, prostate 135
 Catheter toxicity 155
 Cell cycle 12
 – viability 12
 Chemoimmunotherapy 6
 Children 162
Chlamydia trachomatis 217
 Chordee without hypospadias 107
 Crista urethralis 34
 Cyclophosphamide 6
 Cyst 162
 Cystoscopy 186
- Desmoid tumor 48
 Detubularized intestinal substitute 30
 Dialysis 79
 Digital rectal examination 186
 DNA content 181
 – ploidy 18
- Ejaculation 34
 Ejaculatory duct 139
 Embolization, selective 99
 Enzymes 12
- Epidermal cyst 53
 – growth factor receptor 18
 Epididymis 222
 Erectile dysfunction 214
 Extent of disease 130
 Extracorporeal shockwave lithotripsy 82
 – – –, in situ 87
- Female incontinence 150
 Flow cytometry 135
- Gastropouch, operative techniques and results 24
 Germ cell tumor 176
 Gunshot injuries 92
- Hemospermia 139
 High energy shock wave 12
 Histopathology 79
 Horseshoe kidney 158
 Hydronephrosis 102, 158
- Immunohistochemistry 135
 Incidental carcinoma, prostate 196
 Incontinence pads 68
 Infertility 222
 Interferon- α 172
 Interleukin-2 6
 Intracardiac tumor thrombus 38
- Ki-67 index 18
 Kidney 158, 162
 – neoplasms 172
 – –, diagnosis 230
 –, radionuclide imaging 230
- Late relapse 176
 Leiomyosarcoma 166
 Leukaemia 225
 Linsidomine chlorhydrate 214
 Lymph 104
 Lymphangioma 104
 Lymphocytic infiltration 225
 Lymphokine-activated killer cells 117
- Magnetic resonance imaging 191
 Malignant potential 135
 Metaplasia 110
 Metastases 50
 Mumps 179
 Muscarinic cholinergic receptor 62
 Musculus ejaculatorius 34
- Needle biopsy 186
 Neoplasms, multiple primary 230
 Nephroblastoma 38
 Nephrogenic adenoma 227
 Nitric oxide 214
- Oestrogen, oral 74
 Orchidectomy 74
 Orchitis 179
- p53 gene 1
 Papillomavirus, human 125
 Penile block 147
 – injuries 92
 – secondaries 135
 Pericentric inversion 107
 Perineum 53
 Peripheral circulation 74
 Pheochromocytoma 44
 PMN elastase 217
 Polymerase chain reaction 125
 Postoperative pain control 147
 Prognosis 1, 196
 Prognostic factors 130
 Proliferation rate (Ki-67) 181
 Prostaglandin E₁ 214
 Prostate 68, 139, 225
 – cancer 209
 – carcinoma 1
 Prostate-specific antigen 186
 Prostatic cancer 130
 – carcinoma 50, 74
 – neoplasms 191
- Radiation therapy 48
 Radical prostatectomy 68, 196
 RB gene 1
 α_1 -Receptor 62
 α_2 -Receptor 62
 β -Receptor 62
 Renal calculi 82
 – cell carcinoma 79, 117, 181
 – endothelin 57
 – vein 44
- Segmental difference 62
 Semen 217
 Seminal emission 34
 – vesicle 139
 Seminoma 48
 Serum agglutinin titres 143
 Skin metastasis 114

Studer-Zingg neobladder 30
Superficial operation, penis 147

Temporary interruption 44
Testicular neoplasms 222
Tomography, X-ray computed 230
Transitional cell carcinoma 18, 114
Transrectal ultrasonography 139, 186
Transurethral radiotherapy 209
Tumo(u)r progression 1
– suppressor genes 1

Ultrasonic diagnosis 191
Ultrasonography 230
Ultrasound 162
Urachus 110

Uracil and tegafur combination 172
Ureaplasma urealyticum 217
Ureter substitution 97
Ureteral neoplasm 166
– obstruction 102
– polyp 102
– stone 87
Ureteric obstruction 57
Urethra 104
Urethral cyst 169
– injuries 92
– tumors 104
Urethroplasty 92
Urinary bladder 114
– cytology 18
– incontinence 68

Urodynamic investigation 30
– studies 150
Urodynamics 68
Urological tumours 1

Vaccination 179
Vas deferens, dog 62
Vasectomy 143
Vasovasostomy 143

Weanling rats 57
Wilms tumor 38
